

ASSET TRACKING DEVICES

Track the location of anything, anywhere

PART OF THE **CONNECTED SOLUTIONS RANGE**

What are Asset Tracking Devices?

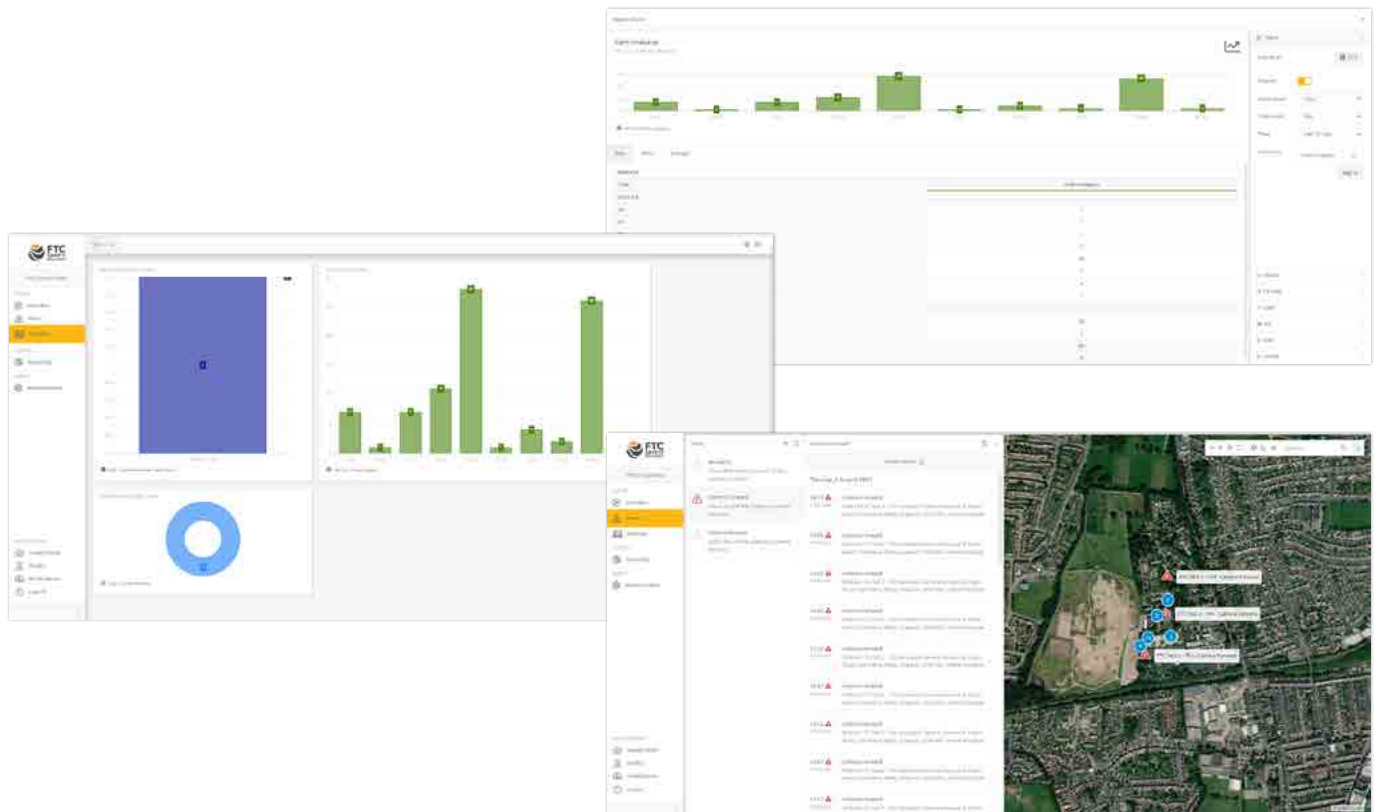

Monitoring the location of your assets is a proactive approach to asset management and therefore cost-effective and a smarter way to run your business.

The software allows you to customise your dashboard and monitor activity remotely too. Keeping track and recording high risk vehicles in high risk areas will save time and costs should any incidents occur. Location, frequency and length of time can be closely assessed too.

Key Features

- More efficient route planning
- Increased security
- Save money replacing assets
- Protect from theft
- Convenient and robust
- Water resistant
- Real time tracking

Dashboard

FTC offer 3 separate solutions:-

FM Lite

A hard-wired device for cars, vans, plant equipment, forklift trucks, etc and can reduce both maintenance and admin costs. Important for managers responsible for tracking inventory.

Features	
Access control - optional	
Internal accelerometer	✓
Track and trace	✓
