# LED SAFETY PROJECTOR LIGHT

Our innovative solution for floor and wall signs

VERY COST-EFFECTIVE

1 YEAR WARRANTY

## What are Projector Lights?

They are powerful image projectors and a perfect solution for signage in difficult areas.

Better and brighter than traditional signage - these low costs lights are ideal for aisles, uneven surfaces, high traffic areas, walkways, busy forklift areas, PPE zones and damp locations where traditional signage won't adhere.

Highly durable and cost-effective, these lights attracts more attention because of their dynamic projection. The Smart Triggered option gives the capability to trigger signage using motion sensors, beam break sensors or a push button. They are easily interchangeable too - simply switch out the image projection lens when you need to project new signage. Comes with a 1-year manufacturer warranty.

## Key Features

- Image quality
- Low running costs
- Project onto any surface
- No wear and tear
- Ultra visible
- No repainting needed
- Smart Trigger options
- Easily interchangeable

### Light formats

Stop Sign

Forklift Caution

Hazard Zone

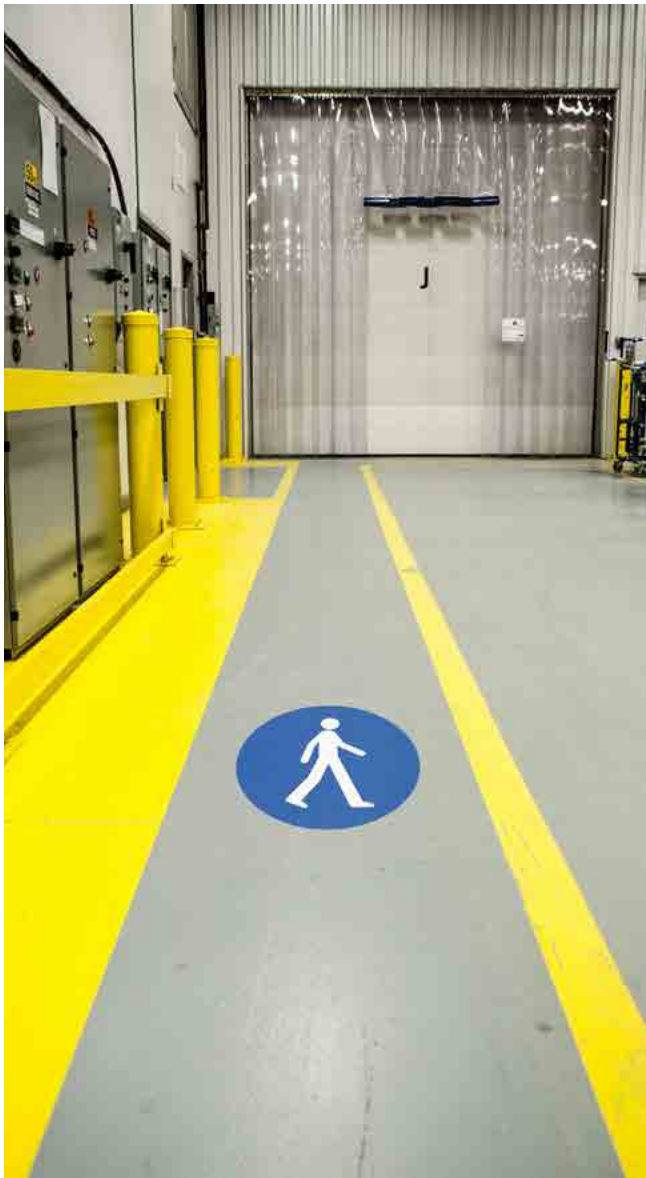

Crosswalk

Custom Full Colour

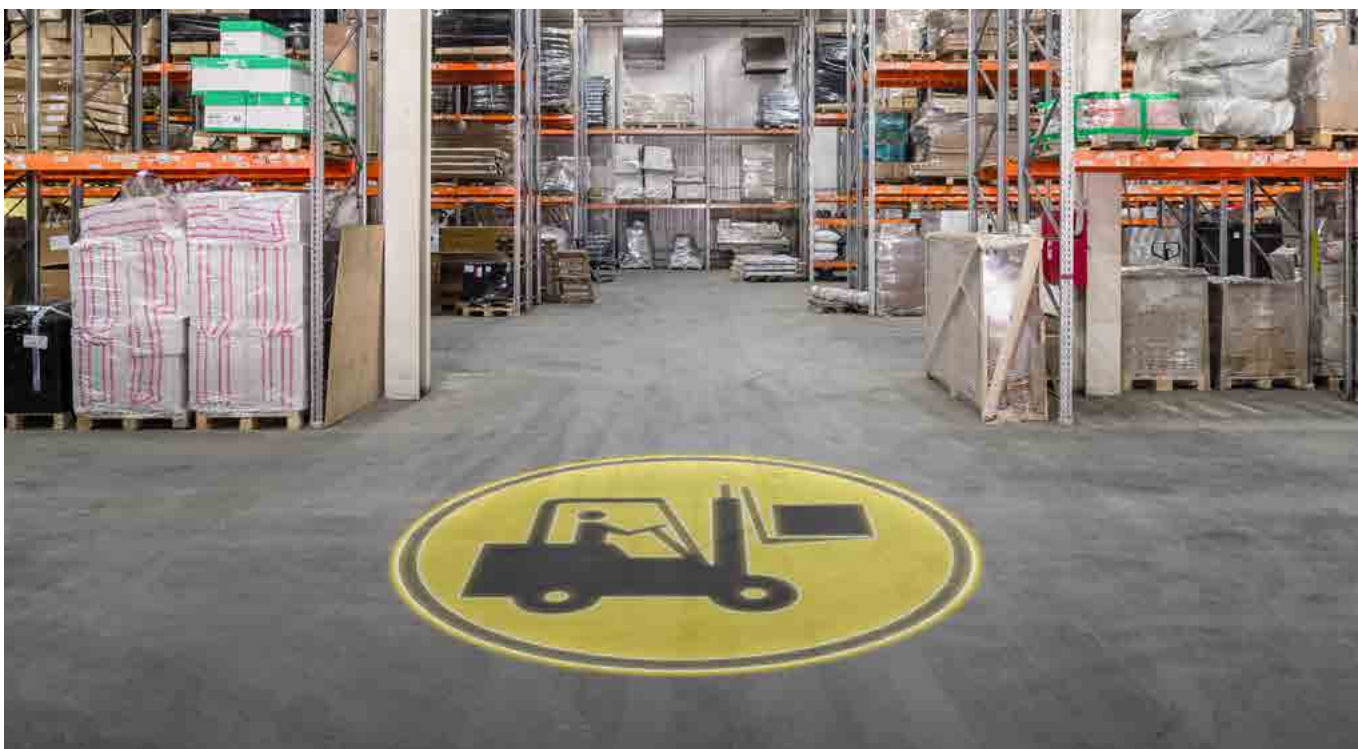

### Virtual Laser Line

These abrasion-resistant laser beams are specially developed for warehouses and industrial floors. They work even on heavily soiled surfaces and project highly visible lines as an efficient warning to pedestrians. The laser unit is mounted on a ceiling and red (dangerous areas) and green (safe walkways) lasers mark different areas or pallet locations.
